THE E&P HYDRAULICS LEVELSYSTEM FOR MOTORHOME OWNERS

PROBLEMS CAUSED BY AN UNSTABLE MOTORHOME

- The whole vehicle rocks when you walk through or get in and out
- Shaking in windy conditions
- Water from the shower and sink does not drain properly
- Doors (toilet, shower) fall open and shut
- Disturbed sleep due to movement and a feeling that you're lying at a slant
- Excessive effort is involved in levelling and stabilising each time you stop
- More time wasted getting moving again when you want to leave

FEATURES & BENEFITS OF THE E&P LEVELSYSTEM

- Each system comprises of 4 hydraulic jacks fastened to the chassis
- Available in a variety of different stroke lengths for different vehicles
- Jacks are powder-coated to prevent corrosion
- Stainless steel footplates prevent corrosion
- 2-year warranty
- Horizontal in 120 seconds
- Effortlessly level at the push of a button
- Fully automatic
- Sturdy and vibration-free position
- Additional theft protection
- Kind to chassis frames
- Safety feature prevents driving off with jacks deployed
- Improved drainage from sink, shower and waste water tank
- Quick and easy getaway when you want to leave

REMOTE CONTROL

The optional wireless hand-held remote control allows you to freely manoeuvre around the motorhome, keeping a watchful eye on any possible obstructions or safety hazards. Just stand back and watch whilst the 2 minute levelling process takes place.
